DEPARTMENT OF MEDICAL SCIENCES

PREFACE

The Thai Pharmacopoeia is the national compendium that establishes specifications, criteria, and standard test methods to ensure the quality, safety, and efficacy of modern drugs marketed in Thailand. Since its first publication in 1987, subsequent volumes in the series have been released, with continuous efforts to enhance their usefulness.

The current Thai Pharmacopoeia II, Volume I, Part I, Supplement 2025 includes monographs on drugs derived from non-indigenous plants, a newly developed monograph on a biopharmaceutical product, and monographs on drug preparations not covered in other official pharmacopoeiae. The latter was developed in collaboration with a key stakeholder.

In line with environmental responsibility and to promote accessibility, since 2024 all publications in the Thai Pharmacopoeia and Thai Herbal Pharmacopoeia series have been made available in electronic book (e-book) format, downloadable from the Bureau of Drug and Narcotic, Department of Medical Sciences website.
